

BRINGING QUALITY AND PEOPLE TOGETHER

Subject: "Surveyors' Network Surveys & Training Participation – The market of waterways & seaplane infrastructure"

Summary: The current Service Promotion Circular reports upon the company's Surveyors' Network activities.

1. **INTECA Surveyors' Network Activity:** In our most recent Service Promotion Circular we had announced the participation of our Surveyors' Network members in structured training sessions, held in June and July 2021, focusing on ISO auditing and quality management systems assessments for various industrial segments. Specifically, and within the context of strengthening the operational capabilities of our Surveyors, the Network members have successfully participated in surveys related to the segments of maritime vocational training, shipbuilding & ship repairs, as well as marine waste management.
2. **INTECA Surveyors' Network access the market of waterways & seaplane infrastructure:** Among others, in the coming weeks, members of the Surveyors' Network will focus towards activities related to the quality assurance of proper modern infrastructure (water airports), aiming at the provision of the business support required both for the seaplanes and their facilities for companies flying with seaplanes from port to port offering safe, unique and quality services and experiences to the passengers (Law No. 4146/18-4-2013 on the operation of seaplanes and water airports).
3. **INTECA via its Surveyors' Network capabilities,** is ready to audit, test and verify against a broad context of standards within the non-marine and marine sectors, thus delivering specialised advisory and consultancy services for a variety of business assurance and quality compliance matters.
